CAREER OBJECTIVE

Full-stack software engineer with hands-on experience designing and deploying responsive, production-grade web applications — from e-commerce platforms to live institutional systems — using HTML, CSS, JavaScript, Supabase/PostgreSQL, and Firebase. Currently completing a Bachelor's degree in ICT while running an independent practice, KyKal Technologies, delivering client websites, dashboards, and business systems. Strong focus on clean code, polished UI/UX, and taking projects from concept through to real, deployed use.

PROJECT EXPERIENCE

Kathy Fashion — E-Commerce Store

Full-Stack Developer

Built a responsive fashion e-commerce experience with product browsing, cart, wishlist, and checkout workflows.

Tech: HTML, CSS, JavaScript, Paystack, Supabase, PostgreSQL

Eastgate Academy — School Management Platform

Full-Stack Developer

Designed and built a live school management PWA used daily by staff and roughly 100 students, with role-based parent, teacher, and admin portals, mobile money payment integration, an AI support chatbot, and automated SMS notifications.

Tech: HTML, CSS, JavaScript, Supabase, PostgreSQL, Vercel

MARPOL Operations Dashboard

Front-End Developer

Designed an operational dashboard concept for monitoring maritime environmental compliance and port operations, using data visualization and status indicators.

Tech: HTML, CSS, JavaScript

Corporate Law Firm Website

Full-Stack Developer

Built a professional corporate website focused on trust, clarity, and a strong client-facing user journey.

Tech: HTML, CSS, JavaScript

SOFT SKILLS

Strong problem-solving and debugging skills

Highly self-motivated and eager to learn

Adaptable and quick to pick up new technologies

Excellent time management and focus

Strong attention to detail in UI/UX and design

Clear communicator and collaborative team player
